Technology

Each of our fragrance nebulizers uses patented cold-air nebulizing technology to release nanoparticles into the air that leave behind no residue.

This technology preserves the integrity of our Aromatica oils to deliver pristine, evenly distributed scent without using heat or diluting the oils in water or alcohol.

Using only Aromatica360 Aromatica oil blends will guarantee the best performance of your diffuser. There is no need to mix or dilute with water, carrier oils or alcohol. Our scents are produced to be used in the diffuser without alteration. Simply fill the bottle with your favorite Aromatica360 Aromatica oils and set the intensity.

Usage of sealing tape:

- 1. Before replacing the atomizing core, wrap the sealing tape around the thread of the atomizing core, preferably 3-5 turns to prevent air leakage.
- 2. Before connecting the quick connector, wrap the sealing tape around the quick connector thread, preferably 3-5 turns to prevent air leakage

Quick start

- 1.Open the door by key 2.Take of the back cover
- 3.Twist the bottle

4.Fill the bottle by essential oil 5.Fix the bottle in the machine machine

Where to Place

LOCATION

The AroMax Pro is designed to be placed Large Places and open areas.

SCENTING COVERAGE

The AroMax Pro can be adjusted to scent an area ranging from 10 to 50 sq.ft (1 to 50sq.m)

DEVICE LOCATION

An important element of your scenting experience is to properly position the device in the room to ensure optimal performance.

Choose the location where the Aromatica oil molecules can use the natural airflow in a room. This is particularly important with air-conditioned spaces. The best location for the AroMax Pro is where there is good airflow.

Do not place the AroMax Pro near an HVAC return grill, exhaust, fan, or vent. Setting near open windows will cause the scent to escape the space. Work with the natural airflow of the space.

Try a variety of locations and settings until you are happy with scent coverage. Give the AroMax Pro a little time to adjust to the new location and setting before changing it again

Setting Scent Intensity

Once the Aromatica360 Aromatica oil is placed in the device, basic operation is simply adjusting the scent level to match the room size, ambience or occasion. Simply turn the machine on using the intensity buttons. Starting at level 1, after a few minutes, you will experience the scent spreading around your space. If needed, adjust accordingly. Once you have chosen the right setting, you should only have to adjust slightly with different Aromatica oils.

Keep nose clear from the scent output when the device is operating. Instead, waft air towards nose to experience the full Aromatica oil scent.

When changing the scent level, give the AroMax Pro some time to equalize the scent level throughout the space before you decide if you need to adjust.

Cleaning your diffuser

Our AroMax Pro, Aromatica oils and diffuser cleaner is a system designed to work together to provide an elevated scenting experience. In order to keep the diffuser functioning at its best, make sure to clean it every time you refill the bottle with a new scent. The nebulizer inside the diffuser can become clogged so we only recommend using our specialized Aromatica oils. Other oils may have thick, heavy base oils that could result in the diffuser malfunctioning. Using non Aromatica360 oils in your device will void the warranty.

- 1.After installation, please keep the machine vertical. Tilt or lie flatly may cause oil overflow. The machine efficiency may be affected if the circuit board is contaminated.
- 2. Shall not modify, disassemble or repair the machine arbitrarily. Any failure happens, please contact relevant technician in time.
- 3.This product is only applicable to our provided fragrance. Do not add other essential oils to avoid damaging the machine; nor disassemble and clean it by yourself. The matched fragrance can be purchased separately for replacement.

Attention: The machine is NOT the lid, when it is working, the machine should be kept upright to avoid leaking and damage to the machine. Use the matched lid for sealing.

- Do NOT use quick charger for device.
- Do NOT use or store the device above 70°C
